

Remarks

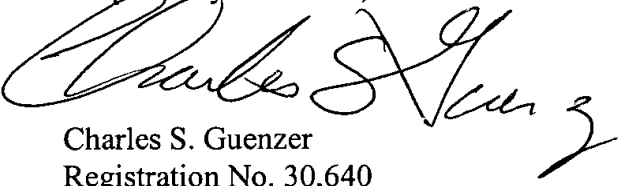

Claims 6-11 and 14-43 remain in the application.

The new claims are similar to those previously allowed but emphasize tantalum, as supported at page 30, line 19 of the filed application and the imbalance of the rotating magnetron.

In view of the above amendments and remarks, allowance of all claims is respectfully requested. If the Examiner believes that a telephone interview would be helpful, he is invited to contact the undersigned attorney at the listed telephone number, which is on California time.
